

MAGO

MAKE THE DIFFERENCE

CHECKOUTS &
SELF SERVICE SOLUTIONS

The background of the slide is a dark, futuristic cityscape. On the left, there are several tall, rectangular buildings with glowing blue vertical lines and patterns on their facades, resembling digital data or circuitry. The ground in the foreground is dark and reflective, with glowing blue lines and patterns that look like circuitry or data paths. The overall color scheme is dark blue and black with bright blue highlights.

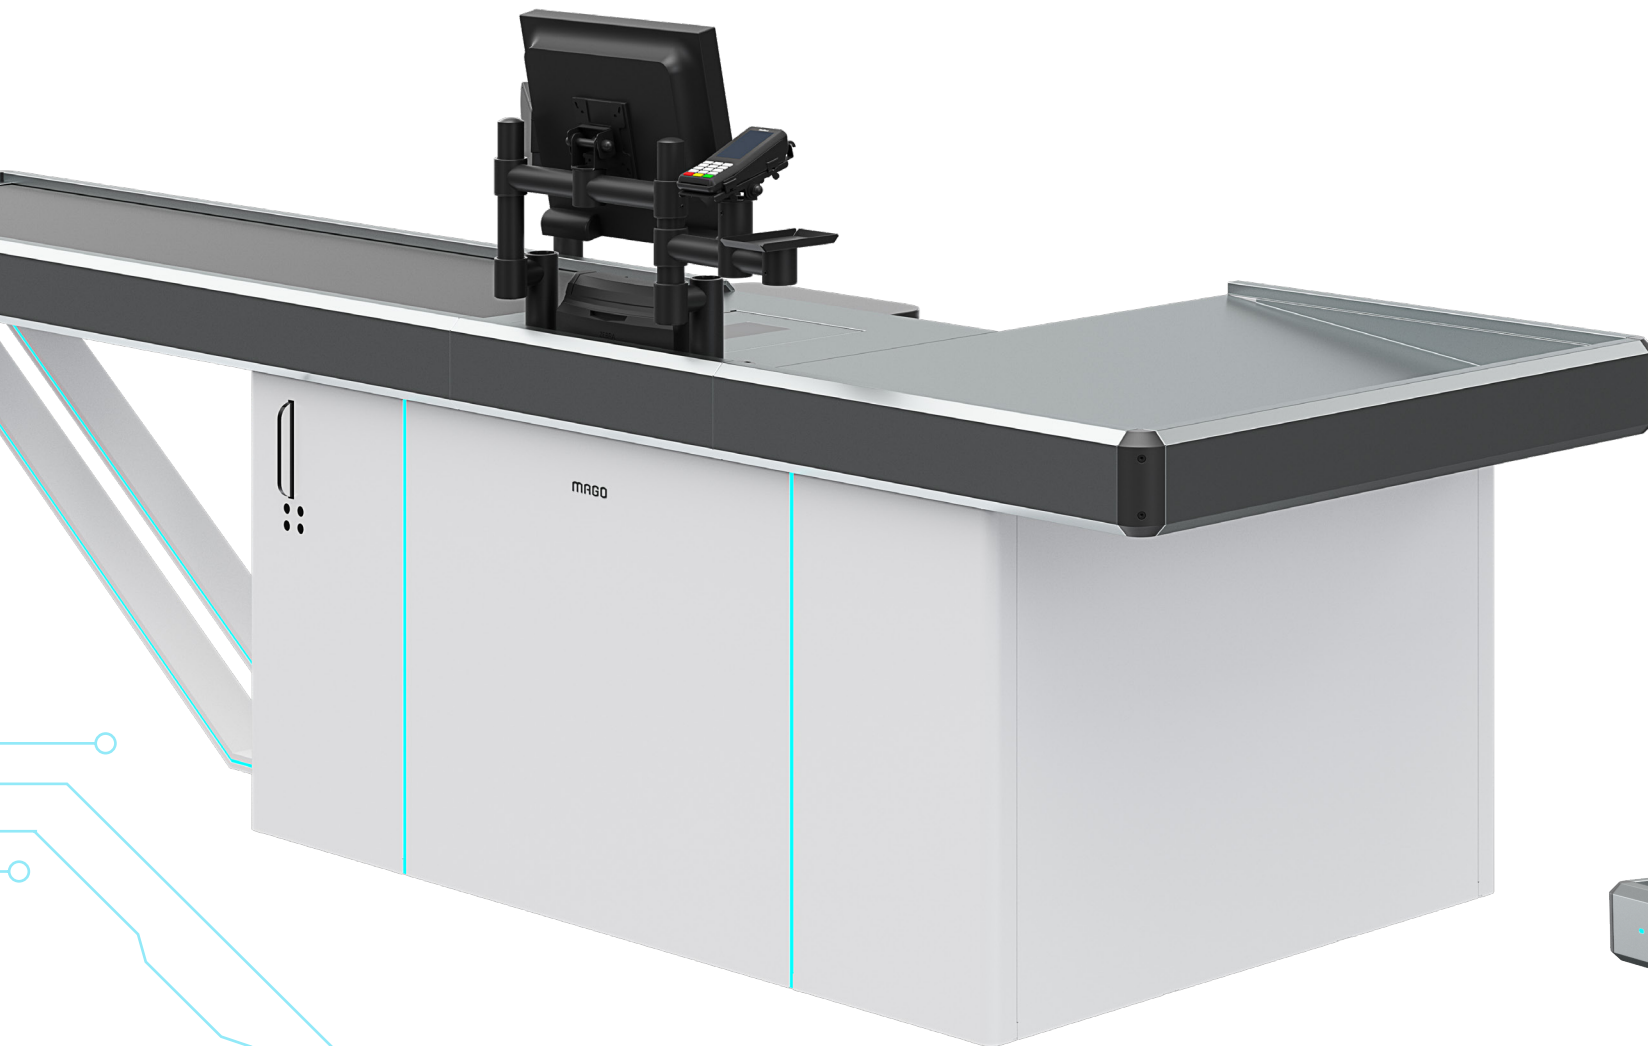

CHECKOUTS & SELF SERVICE SOLUTIONS

The payment zone is the last point of contact between the Customer and the store. It is the last chance for sales in the impulse zone, and the last opportunity to reinforce a store's modern and friendly image. For the complete comfort of your Customers, Mago presents a new line of checkout counters and self-service checkouts supporting payment cards and including a cash payment module.

SMOOTH TRANSACTIONS, RELIABLE OPERATION

Elegance and functionality go hand in hand. **EDGE Checkout Counter** is the perfect solution for retailers who want to **provide their customers with the best transaction experiences** and also stand out in the market with a modern design.

- the **modular design** of the box allows for easy configuration and customisation
- inspiring design
- built-in **LED backlighting** that can be easily controlled
- option of **decorating with woodgrain elements**
- optionally, with the use of a rotating table, the box will become a hybrid, i.e. a traditional retail cashier or self-service

FLEXIBILITY WITHOUT LIMITS

The B5 Checkout Counter is a combination of a cashier and a central module that can work as both a traditional and a self-service checkout. It has an automatic cash handling module that shortens the payment process and minimizes the risk of fraud committed against the retailer. With the exceptionally long tape used in this solution, the customer can place the contents of not only the basket but also the entire cart at once.

The module can work in self-service mode or cashier mode, allowing it to be adapted to the current situation in the store.

The B5 checkout counter **allows freeing up employees' resources for other tasks in the retail facility.** During peak store traffic, an employee serves customers as in a traditional checkout. During the remaining opening hours of the sales point, the B5 checkout counter operates in self-service mode.

ONE-STOP SOLUTION, PERFECT PERFORMANCE

Streamline the payment process in your store with **B5 Express Checkout with a rotating table, allowing for flexible change from a conventional checkout counter to a self-service checkout.** Our innovative hybrid checkout counter increases the throughput of the payment area, **resulting in more sales.**

B5 Express Checkout is adapted to the latest market trends, such as NFC payments, self-service, and cash management, allowing for adaptation to meet the needs of your customers. Increase the efficiency of the payment area with one comprehensive solution.

- the ability to integrate the latest market solutions, such as cash
- management and a rotary table
- durability and resistance derived from the utilized raw materials.
- can be customised and customised
- post-sales ease of use

FULL OF POSSIBILITIES

The simple yet modern design of **SCO QUBE** self-service checkout perfectly fits any retail space, even the most contemporary ones.

The SCO QUBE are ideal for large retail spaces. The self-service QUBE Long checkout has a longer packing area, allowing for storage of larger purchases.

For customers who prefer traditional payment methods, **each of these checkouts can be equipped with a cash payment module.** Our solutions are designed and developed by specialists with passion and years of experience.

We are the direct manufacturer, supplier and service provider.

QUBE self-service checkouts:

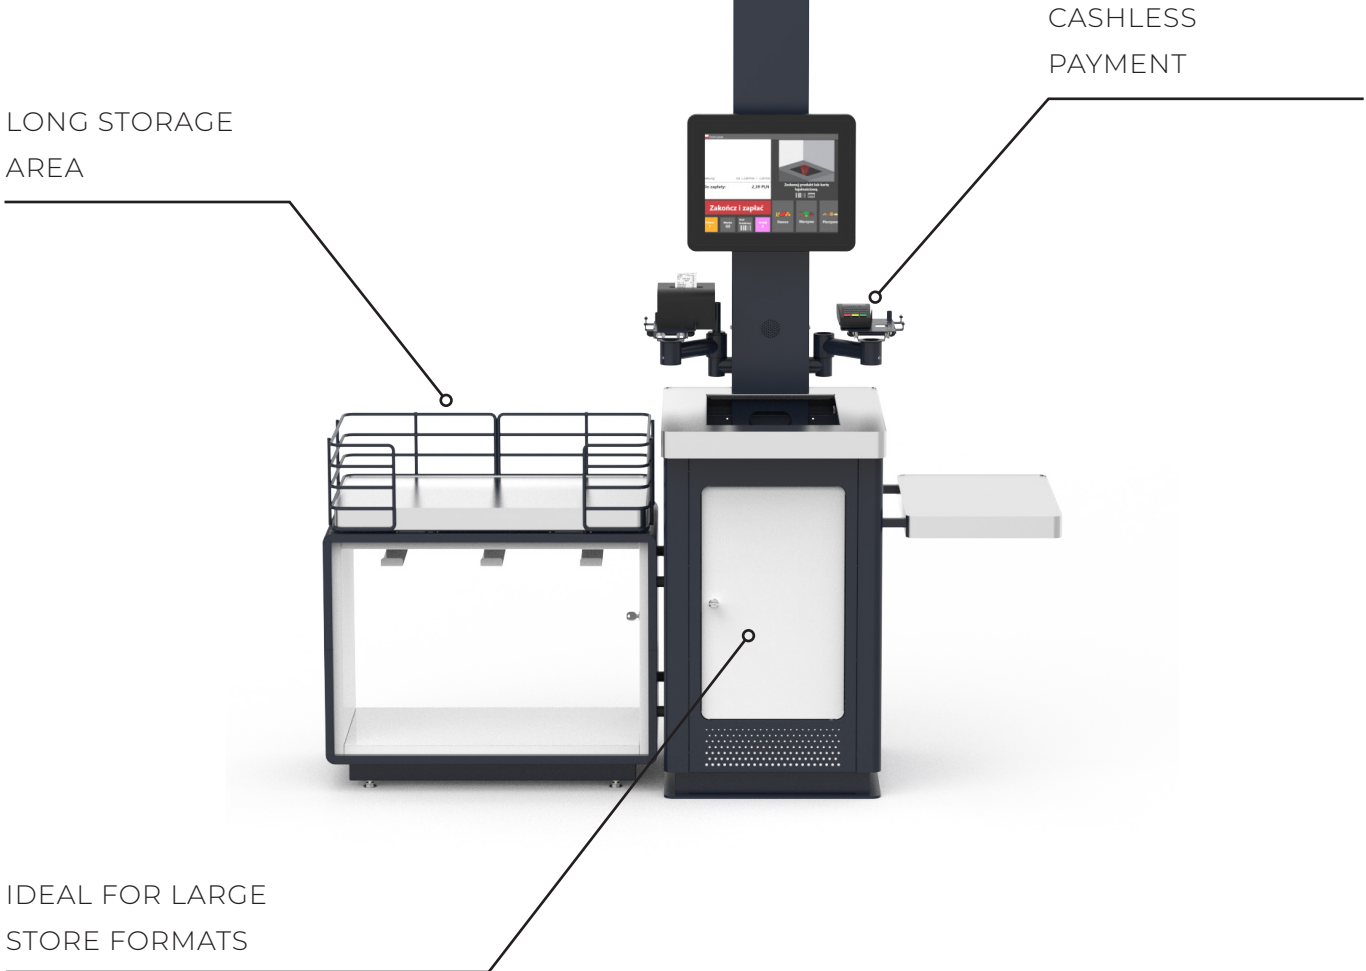

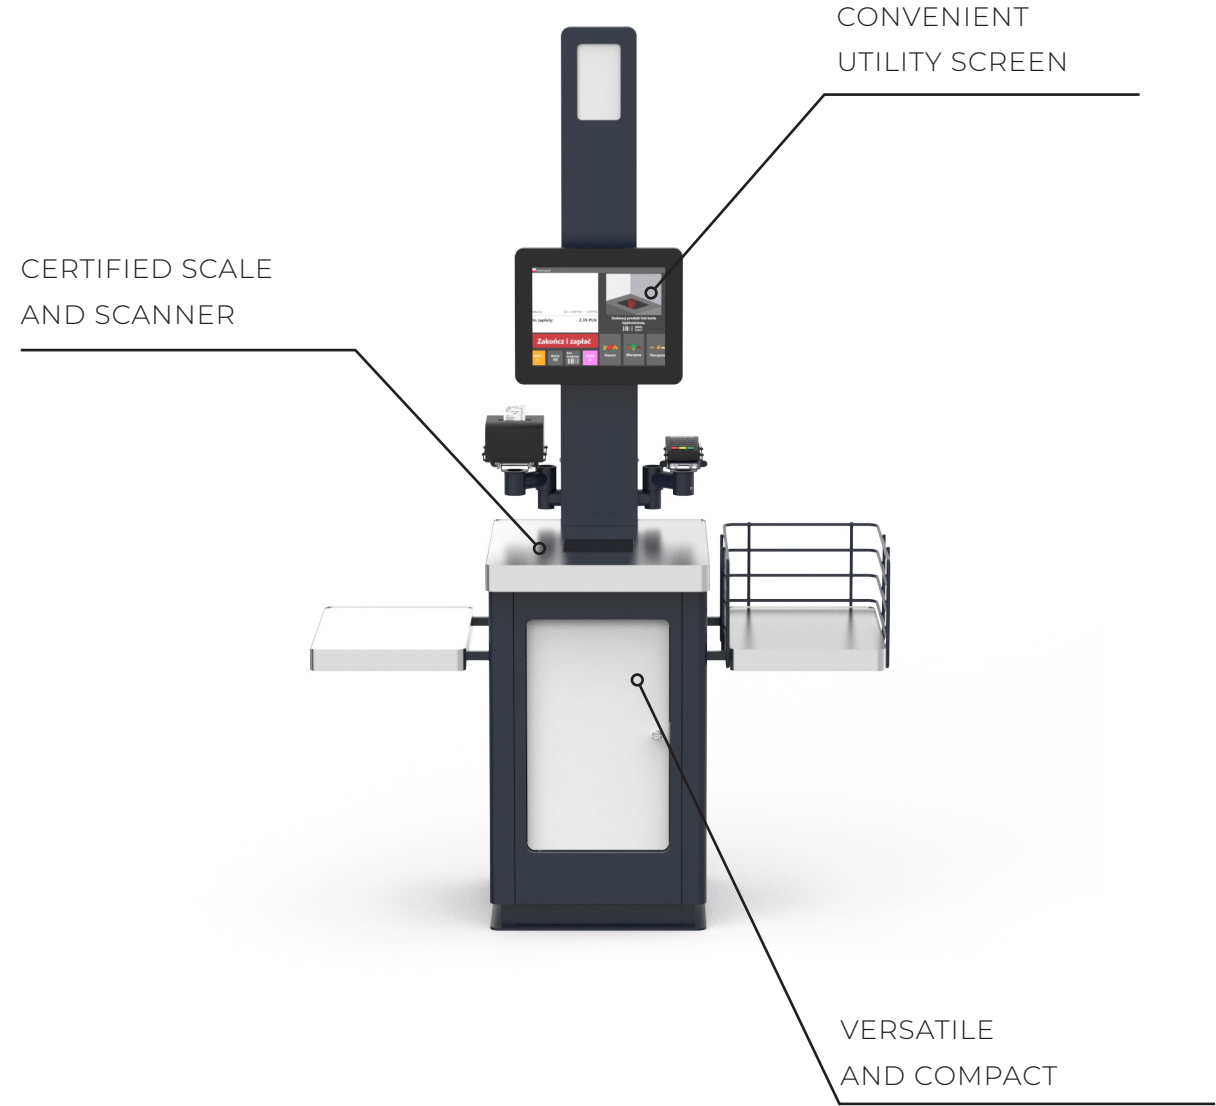

- modular solution
- wide range of colours
- proven and intuitive software
- comprehensive service

CASH PAYMENT
MODULE

We have designed the QUBE self-service checkout line as a modular solution, so that we can offer solutions by tailoring the components to the specific needs of the customer. Our offer is aimed at both retail chains and smaller shops that are considering the introduction of self-service checkouts.

GOOD ORGANIZATION IS A KEY

Concept Convenience is a combination of a customer service point and a protected product area, including cigarettes, alcohol, and drugs. **The integrated mini bistro area allows for the serving of coffee, juices, hot-dogs, and other food products.**

The self-service counter and cashier area allow for quick and convenient customer service, streamlining the flow of customers in the store. This is the perfect solution for convenience stores and gasoline stations that want to provide their customers with **all necessary services in one place.**

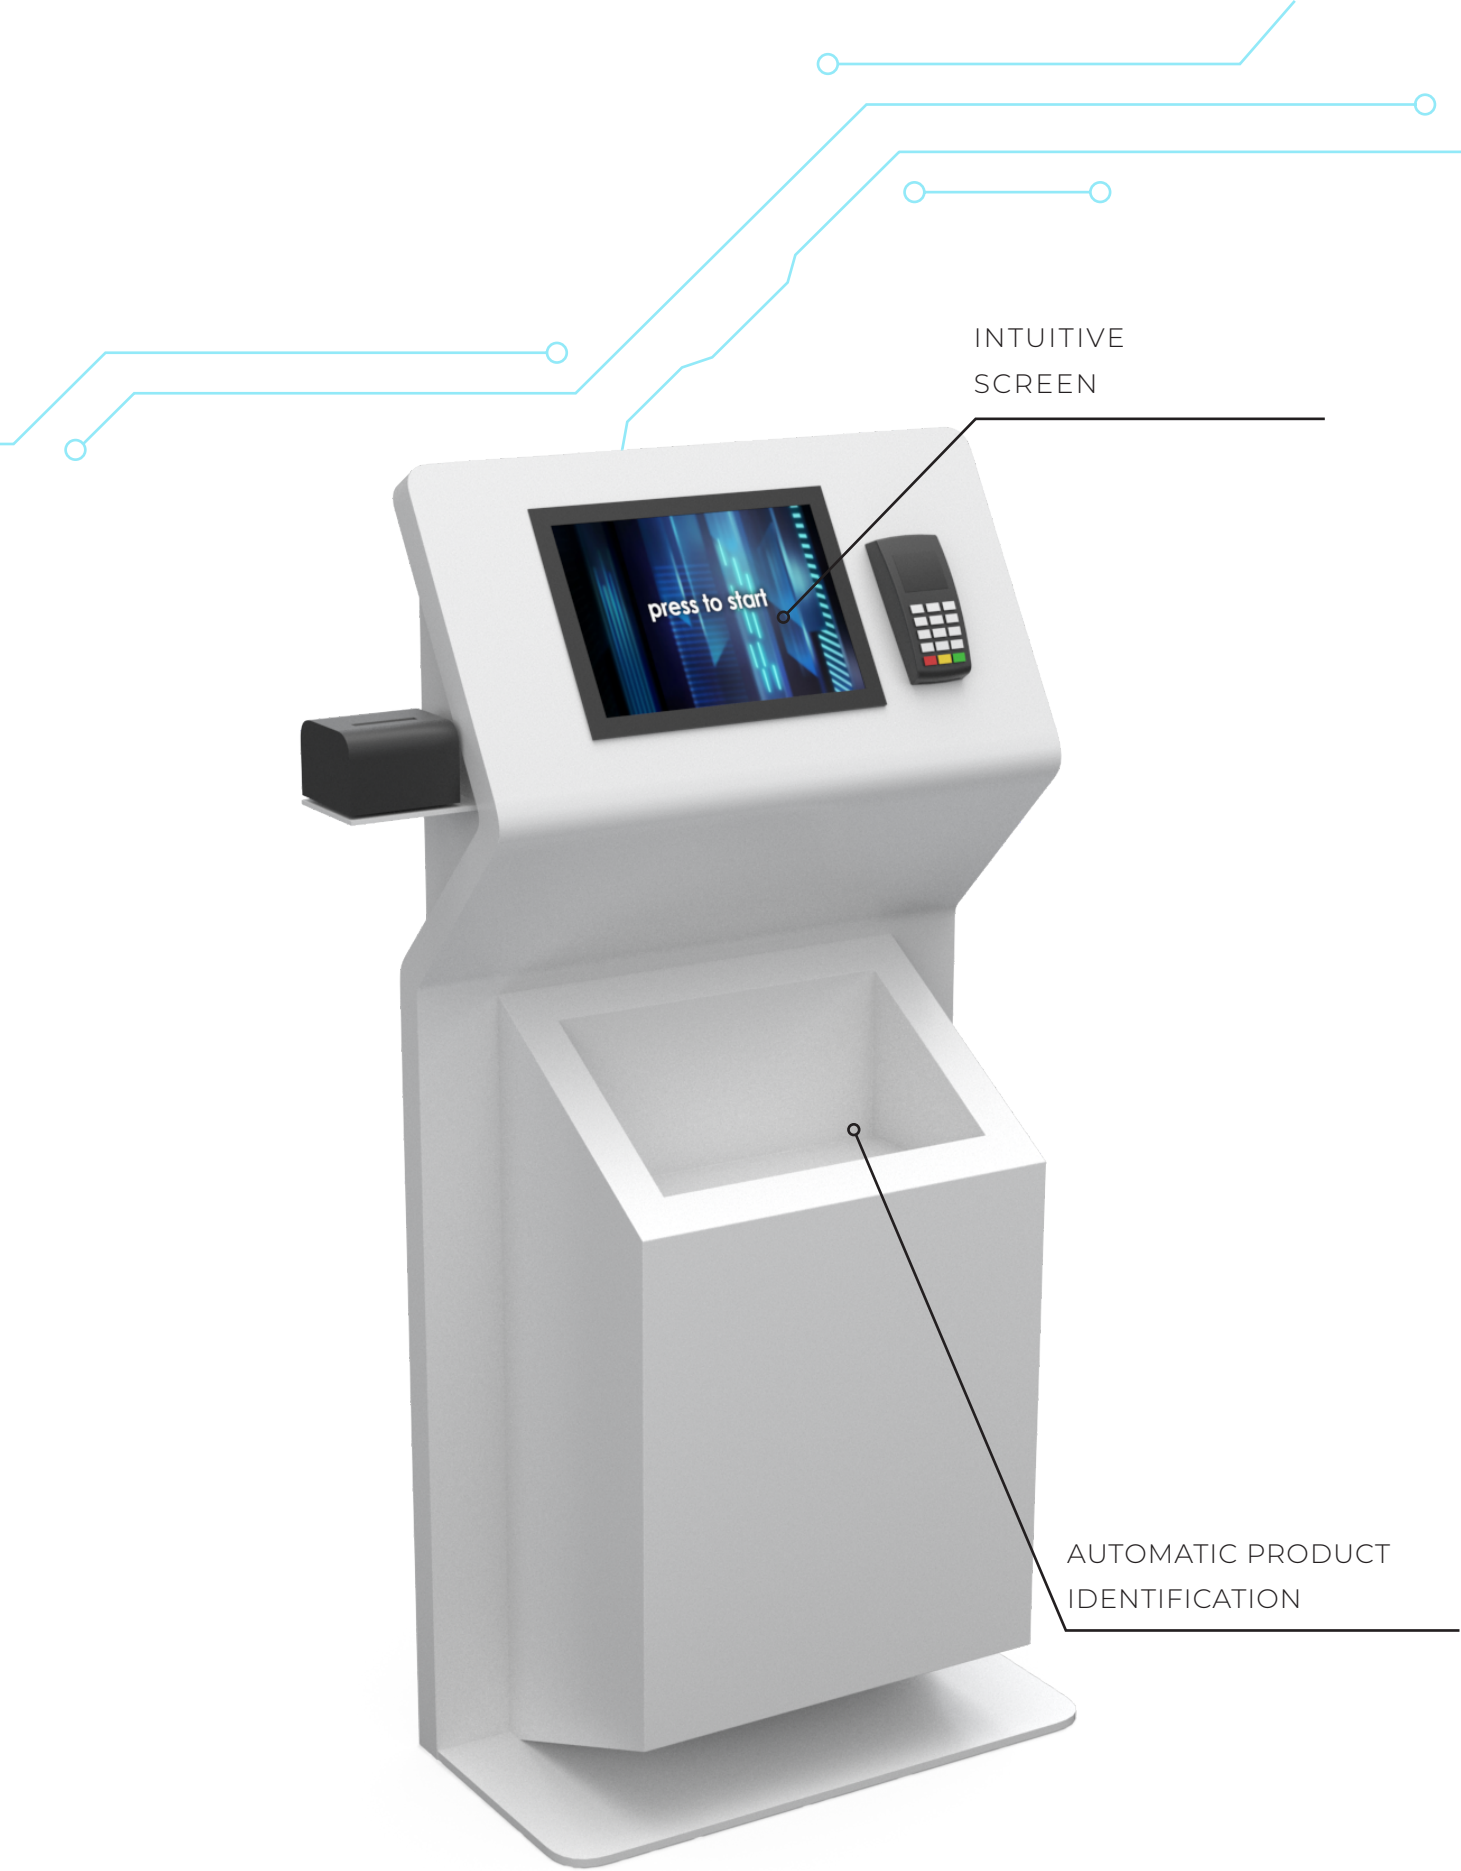

QUICK, SIMPLE, EFFECTIVE

Qube Kiosk is a compact self-checkout solution that streamlines the shopping process and reduces lines.

All checkout functions in one attractive solution. **A larger screen than in a standard self-checkout supports cross-selling and upselling.** The Qube Kiosk is equipped for cashless transactions and can be supplemented with a cash management module. It integrates with other self-service devices and supports „endless aisle” functions.

- hardware and software platform allows personalisation and easy integration with external peripherals
- easy to build and install
- possibility to expand the functionality with a hybrid mode
- allows operation in both self-service and cashier mode

RFID TAILOR-MADE SOLUTION

Improve customer shopping experiences in your store and stand out in the market. SCO Fashion & Sport is an innovative solution for the fashion industry. **With a product information app and automatic product identification, customers can efficiently complete their purchases.**

- enables cross-sell and up-sell communication
- provides product statistics
- gives the ability to purchase goods temporarily unavailable in the store
- with automatic product identification, it facilitates inventory and logistics processes for goods
